SEBASTIEN BACS
Fullstack Developer

👤 Profile

I am a 28-year-old Belgian developer with 5 years of experience in both front-end and back-end development, looking for my next challenge! Clear communication and a well-defined scope are my definitions of a successful project. I actively participate in the analysis, execution, and maintenance of any web project I am a part of.

💼 Work Experience

2022 – 2024

Monizze SA
Fullstack Developer

- Building a reuseable component library with Vue
- Analyse and define maintenance and feature tickets and implement them using PHP (Laravel)

2021 – 2022

Capgemini ~ BNP Paribas
Java Developer Consultant

- Create and build onboarding platform for VIP customers using React.
- Estimate, scope and alayse tickets
- Build up Oracle Database based on project needs

2018 – 2020

Efficy CRM
Project Developer

- Customize standard CRM product to client needs using Delphi and javascript.
- Update & manage big SQL databases

2018

Sciensano
Intern

- Set up a data exchange form with sharepoint with pre-validation.
- Create SVG chart generator private API from CSV data using Vue and AdonisJS
